

The liberal soul shall be made
fat, and he that watereth shall
be watered also himself.

Annual 4-H Rally Camp Taylor School County-Wide Contests

Four hundred and fifty 4-H Club members, leaders and parents attended the annual 4-H Rally held at the Camp Taylor School, Saturday, May 6. Clarence Woodrow and Douglas Hall of the Highview Club took top honors in the agricultural division with their demonstration, basement storage units for storing fruits and vegetables.

In the Home Economics division the championship went down to Mary Ann Stueland and Freda Payton with their demonstration on laundering curtains. In the individual demonstration contest, Jackie Jenkins of Fern Creek, carried home the purple ribbon with his demonstration on control of cattle grubs. Mary Ann Huffage, Greenwood Club, likewise took top honors among the girls with her individual demonstration on pattern placing and cutting a garment.

One of the high lights of the all-day program was the Style Review which was won by Miss Revere Lorch of Anchorage. Eloise Smith won a outfit consisting of a flared navy blue skirt with matching cape lined in bright gold taffeta. Her hat, which she also made was blue wool sailor with matching taffeta bow. Eloise made her outfit in her 4-H clothing project this year.

The seeds and crops identified by William Stutzbarger of Maple Grove Club with Marvin and Fred Smith of Kerkick and James Bentley of Mill Creek tying for third. In the dairy cattle judging contest, the following boys were winners: First, Richard Harrod Greenwood; second, Jimmy Hadden, Kosmosdale; third, Jimmie Cherkwall, Valley.

Other winners in the rally were as follows: Agricultural Demonstrations: Donald Gray and Kenneth Womack of Greenwood, blue ribbon; Raymond Felker and Calvin Hatfield of Medora, blue ribbon; Reid Smith and Don Smith of Kerkick, blue ribbon; Phillip Horn of Aurora, red ribbon.

Home Economics Demonstrations: Demonstration team winners were: Ruth Chambers and Gloria Simpson, Fern Creek; blue ribbon; use, blue ribbon and Joy Garey and Mary Dennison, individualizing your pattern, blue ribbon. Thelma Powell, Worthington, making a lamp shade, red ribbon and Daisy Johnson, Highview, articles made from feed sacks, red ribbon.

Those who won blue ribbons in sewing exhibits, and who will be entitled to exhibit their clothing work at the County, District and State Fairs are as follows: Towels and potholders—Charlene Stovall, Highview; Patty Conn, Highview and Elizabeth Grass, Anchorage.

Aprons—Jane Elizabeth Grass, Anchorage; Mary Ellen Morris, Anchorage and Faye Sandlin, Anchorage. School dresses and slips—Patricia Lee Duval, Greenwood; Elizabeth Welch, Fern Creek and Diana Roman, Fern Creek. Pajamas and housecoats—Betty Ann Burns, Valley Graded; Shirley Roman, Fern Creek and Alma Smith Fern Creek, Playclothes—Nancy Redmon, Valley Graded; Loretta Higgs, Highview and Shirley Jackson, O'Bannon, Dress costume—Charlene Powell, O'Bannon; O'Bannon, Dress costume—Shirley Yates, Rita, Formal Dress—Laura Mae Smith, Eastwood and Eunice Jones, Anchorage.

Semi-tailored—Ann K. Lynch, Highview; Mary K. Dennison, St.

KNOW THE TRUTH

Methodist Church

One of Methodism's outstanding scholars and teachers will be the Methodist Hour speaker Sunday morning, May 18, at 7:30 a.m. over WHAS. Dr. Wyatt Allen Smith, Chaplain of Emory University, Associate Dean of the Graduate School of Theology, Emory University, Georgia, will speak on the subject, "Ye Shall Know the Truth."

This sermon is one of the 1948 series of the Methodist Hour. The theme is "The Teachings of Jesus and the Present Scene."

Greenwood and Joy Garey, Greenwood, Tailored Suits; Mary Ann Huffage, Anchorage, Mary Ann Huffage, Greenwood and Ruth Chambers, Fern Creek. The following blue ribbon food winners are to exhibit at the State Fair:

Rolls—Joan Stinson, Greenwood, and Inez Dunn, Greenwood; Betty Scheyne, Medora. Biscuits—Patty Ferry, Greenwood; Patty Conn, Highview, and Rose Smith, Greenwood.

Plain sugar cookies—Patty Conn, Highview; Joan Stinson, Greenwood, and Betty Scheyne, Medora. Cup cakes—Kenneth Wonder, Greenwood; Ann Brentlinger, Highview, and Dorothy Cockriel, Kerkick. Butter cakes—Maureen Gill, Medora; Carol Hatfield, Medora, and June Culey, Greenwood. Oatmeal cookies—Joan Stinson, Greenwood; Inez Dunn, Greenwood, and Ruth Altmiller, Fern Creek.

Baking entry—Joan Stinson, Greenwood; Inez Dunn, Greenwood and Betty Scheyne, Medora. Another 4-H champion who will be awarded a trip to 4-H Week in the winner of the Training Judging Contest, Genevieve Smith. Alternates for the 4-H Club Week trip are Eloise Lorch, clothing judging champion, and Joan Stinson, foods judging champion.

Winners of the demonstration contest will compete for the honor of District Champion at the District Demonstration Contest to be held in Lexington, on the University of Kentucky campus, June 11-14.

Miss Eloise Lorch will represent Jefferson County in the State Style Review at the State 4-H Week where, she too, will compete in the State Contest.

Some very delightful entertainment was furnished by the members of the Fern Creek 4-H Club, under the direction of Mrs. Josephine Miller.

Suzanne Victoria is the small daughter of Mr. and Mrs. Hillard Lock, Anderson, born April 13, 1947.

Mass Meeting May 15 To Protest Moving H.S.

Jefferson County

"Do we retain it or do we lose it?" that seems to be the \$64 question in the minds of many local citizens this week, as they contemplate the fate of the Jefferson County High School. A mass meeting has been called for Saturday night, at 8 o'clock, at the school auditorium.

The purpose of the meeting is to acquaint the parents and others interested in the high school with the information now available as to the possibilities of the Jefferson County High being consolidated with the Fern Creek High School.

Many of the local school patrons who are promoting Saturday night's mass meeting said to-day, "If we are not successful in retaining a modern high school in this community it will be a major setback for Jefferson County." Stirred by the possible national leaders are appealing to citizens to attend the meeting.

Plan Reorganization Of Boys Scout Troop

The Buechel Presbyterian Church, supported by the Hikes P.T.A., the Buechel Civic Club, and the Buechel Recreation Center is planning the reorganization of Scout Troop 108. A get-together for all parents and their sons, ages 12 to 18, is scheduled for Monday evening, May 17, 7:30 p.m., at the Buechel Presbyterian Church.

The purpose of the meeting is to make plans to carry out the reorganization of the troop. Scout executives will be present. H. G. Giffin, neighborhood committee, ages 12 to 18, of the Buechel area, and their parents are cordially invited to attend.

A color film will be shown. "On the Trail" will be shown. All boys 12-15 of the Buechel area and their parents are cordially invited to attend.

Buechel Woman's Club Meets Thursday, May 20

The Buechel Woman's Club will meet Thursday, May 20, at 11 o'clock, in the Social Room of the Buechel Presbyterian Church. Luncheon will be served at 12:15. The program for the month is "Literature."

A flower and plant sale will be held Saturday, May 21, at 8 a.m. in the morning at the Samuel's Funeral Home in Newburg.

Roach Family - Four Generations

Jefferson County

These four male members of the Roach family represent four generations. The senior member, Arno L. Roach (Kansas City, Mo.) center standing left to right, Rev. Lloyd L. Roach, pastor of the First Baptist Church, and Taylorville opposing Oklahoma, at Oklahoma.

Jefferson County lost last Sunday's game to J. S. Cafe 6 to 5 and Taylorville edged out Buechel 3 to 2.

Immanuel Church To Mark 50th Year

Jefferson County

Beginning on Thursday of this week Immanuel Evangelical Church (Taylorville Road and Doup Avenue, is observing its 50th anniversary with a series of special, appropriate services. Touching off the week's observance was a Mother and Daughter Banquet Thursday evening, when a series of scenes were given picturing the history of the congregation.

Reminiscences over the past fifty years will be made by some of the members of the congregation at 9:30 Sunday morning, at the Sunday School, when Dr. H. H. Peters, pastor of the church, will deliver the sermon.

Sunday evening, at 7:45, a reunion service will be held for all former members and a fellowship hour for all friends of Immanuel. Guest minister for this hour will be Dr. Norman Schult, pastor of Garfield Park Evangelical and Reformed Church, Indianapolis, Indiana.

The final service in the series of observances will be one to be held on the evening of May 16, at 7:45, when Dr. H. H. Peters, president of the South Indiana Synod of the Evangelical and Reformed Church, will deliver the sermon. The sermon theme will be a fellowship hour with refreshments.

Leading the anniversary program for his congregation will be the present pastor, Rev. Robert C. Zimmermann, who was formerly located at Bardonia Road and Grinstead Drive but moved to the present location in 1925.

Immanuel Church, beginning its work May 15, 1898, was formerly located at Bardonia Road and Grinstead Drive but moved to the present location in 1925.

ALL GOING OUT, NOTHING COMING IN... It looks like a lot of plants, but this stockpile of the Clinton by-products also plant at Pittsburgh was dwindling at an alarming rate as John L. Lewis' coal and military coalitions their strike for \$10-a-month pensions. Steel company officials were not committing themselves as to how long their plants could run on present stockpiles.

Mt. Washington News

By Mrs. T. H. Parrish

Sunday morning will be observed as Golden Cross Sunday at the Methodist Church. The needs at Deaconess Hospital will be stressed. Rev. M. B. May's topic will be, "The Great Physician." The text at the evening service will be, "Do You Want Justice?"

At the Baptist Church Sunday morning a volunteer offering of \$2,070.00 was taken for the purchase of the electric organ recently installed.

Mrs. M. A. Harris was honored Mother's Day by her family by

dinner at E. K. Miller's restaurant on Bardonia Road. Those present were Mr. and Mrs. M. A. Harris, Mr. and Mrs. L. A. Tichenor, Miss Mariana Harris and Roscoe McClure.

Mr. and Mrs. T. H. Parrish had as callers during the week, Mrs. W. D. Armstrong, Waterford; Mr. and Mrs. W. A. Laduau, Zionsville; Mr. and Mrs. P. A. Parrish, Middletown; C. L. Stansbury, S. F. Smith, Darrell Harris, Geneva Dugan, Fred Rinsfelder, Measars, M. A. Harris, Maurice McAfee, J. C. Gentry, Carty Wells, S. M. Harris, Ward H. McAfee, Ben C. Hough and Rev. M. B. May.

Mr. and Mrs. Kenneth Potter, of Louisville, were week-end guests of her parents, Mr. and Mrs. H. F. Lutes.

Mr. and Mrs. C. L. Stansbury and her nephew recently visited relatives in Mt. Sterling.

Mrs. Georgia Moore spent the week-end with her son, Everett and family at Shively.

Mr. and Mrs. Gilchrist, of Louisville, were guests of their daughter, Mrs. L. M. Wigginton and Mr. Wigginton Sunday.

Mr. and Mrs. Darrell Alcorn entertained in honor of her mother, Mrs. E. L. Ryan, on Mother's Day and the birthday of her father, E. L. Ryan. The other guests were Mr. and Mrs. Leroy Moore, Mr. and Mrs. Elmer Alcorn, Mr. and Mrs. Floyd Alcorn, Mrs. Opal Allen and baby, Misses Garneta Smith and Alberta Alcorn, Measars, Kenneth Alcorn, E. L. Jr., and Dolan Ryan.

ROLL OF THANKS TO ITALY. After the vital Italian elections residents of South Philadelphia's Italian colony gathered to offer thanks and to celebrate the defeat of the Communists. Part of the celebration was the signing of a 200-foot scroll, thanking the Pope for his part in saving the Italian people to vote for democracy.

Parents, Mr. and Mrs. George Kaufman, Sunday.

Mrs. Sallie Russell rented some rooms from Mr. Otis Reed and moved there last week.

Mr. and Mrs. Leo Greenwell and the boys, Mr. and Mrs. Robert L. Meyer and sons and Mr. and Mrs. Everett Leffler were Sunday guests of Mrs. Ollie Thorne.

Mr. and Mrs. Ben Thorne visited Mr. and Mrs. Ed Howell Sunday afternoon.

Mrs. Will Stout remained about the same.

Mrs. Sallie Russell visited her son, Mr. Homer Russell and wife, last week.

Dr. J. B. Hutcherson and Mrs. Hutcherson, South Wind Road, held open house Derby Eve in honor of their guests Dr. Ralph Boos and Mrs. Boos of Minneapolis, Minn.

Three injured in Auto Wreck. Mr. Walter Cheatham was seriously injured in an automobile wreck Sunday afternoon near Mt. Washington. He is at General Hospital with broken bones and internal injuries. His little grandson had head lacerations and a sister a fractured skull.

Mr. De Blue, who underwent an operation last week for gall stones is doing very nicely and expects to leave the hospital Thursday. Mrs. De Blue will be with her parents, Mr. and Mrs. Harvey Garrett, for some time. Mr. De Blue returned to Chicago Sunday evening.

Marvin Price had a wreck Friday evening as he was returning from work. He received a cut on his forehead which required five stitches. A little girl on a bicycle received a fractured skull.

Mr. and Mrs. Paul Robinson and Mr. and Mrs. Wallace Reeder were at dinner and supper guests Mr. and Mrs. Claude Hulse, Sunday.

Mr. and Mrs. Bert Reed had as dinner and supper guests Mr. and Mrs. William Fox and two granddaughters. Afternoon callers were Mr. and Mrs. Charles Bowman and daughter.

Rev. Lawrence and Mrs. Lawrence are visiting his parents in North Carolina.

The W. M. S. of Little Flock, will meet at the home of Mrs. Carl Fisher Tuesday.

Dr. Sam L. Cooper and Mrs. Cooper celebrated their sixth wedding anniversary Saturday.

Miss Bernice Thorne called on Miss Katherine McKinney, Shepherdsville. Glad to find her much improved.

Mr. and Mrs. Ed Ray called on Mr. and Mrs. Ed McCain Sunday.

Mr. Will Stout's mother fell and broke her leg and is in the hospital.

Mrs. D. L. Williams has company from Corbin, her sister, niece and baby.

Mrs. Frank Corum and baby were after-church guests of her

Textile Specialists Study

Elastix in Knit Fabrics

Familiar as knit fabrics are in such things as sweaters, hose, close-fitting underwear and gloves, the textile and clothing industry has had relatively little scientific information to go on in producing best materials for elasticity—the stretch and recovery or come-back—that makes possible a close yet comfortable fit.

Pioneering in some lines of this research, textile specialists in the U. S. department of agriculture have had to start by devising their own apparatus and procedure to measure elastic recovery of yarns and fabrics under various stresses and strains. Tests thus far completed have yielded technical data on the stretch and come-back of yarns and plain knit fabrics.

Elastic come-back of fabrics cannot be predicted by knowing that of yarns. This is one point thus far learned. Nylon yarn, for example, is far more elastic than yarn of wool or silk. But when the same yarns are made into plain knit fabrics, the wool or silk fabric is more elastic than the nylon fabric.

Yarns of cotton, linen, wool, silk, nylon and the three types of rayon have been compared, and also 19 plain knit fabrics, some loosely knit with 40 courses to the inch, some tightly knit with 64 courses.

The two types of fabrics, loosely and tightly knit, point up another problem in elasticity—the research scientists have found. A yarn that has greater elastic recovery when knit into fabric of a certain number of courses may have much less in other fabrics. Plain knit fabrics of wool have more elastic recovery when loosely knit. Those of nylon, silk and rayon have more recovery when tightly knit.

Modern Factories Retain

Principles of Hand Loom

Until about 10 years ago spinning and weaving still were done almost entirely by hand. The simple tools of the hand loom and the hand loom were important pieces of equipment in any pioneer home.

Today, spinning and weaving are done on rows of fast, noisy machines in great factories. The principles of these machines are still the same as those of the spinning wheel and the hand loom. In fact, the basic processes are the same as they were a thousand years ago. Modern machinery and science have just speeded up and greatly improved the methods of making wool into useful products.

Two main kinds of cloth come from raw wool, woven and worsted. Wools are made of loosely spun yarns which are prepared from the wool fibers. Manufacturers call these fibers short-staple fibers and the yarns short-staple yarns. They are made of loosely spun, slightly twisted long-staple yarns. Worsted has a smoother, harder finish. Sometimes, wools are made of tightly twisted long-staple yarns. Worsted has a smoother, harder finish. Sometimes, wools are made of tightly twisted long-staple yarns. Worsted has a smoother, harder finish.

No More Cod Liver Oil

No cod liver oil, or substitutes, are needed in getting a healthy shot of a vitamin D. Dr. Henry J. Gerstenberg of Cleveland hospital reported to the American Medical Association. When a baby is eight days old, he is given a single injection of vitamin D. In his abdomen. This is the same form of the vitamin that is produced naturally in the bodies of many fish. The shot is repeated once a year. For five years now it has kept babies in perfect condition so far as their needs for phosphorus and vitamin D are concerned, the doctor said.

Dr. Gerstenberg said that breast feeding in winter, where a baby cannot get a lot of sunshine, is not 200 times in perfect condition so far as their needs for phosphorus and vitamin D are concerned, the doctor said.

He stated that mother's milk does not contain vitamin D, but that breast feeding in winter, where a baby cannot get a lot of sunshine, is not 200 times in perfect condition so far as their needs for phosphorus and vitamin D are concerned, the doctor said.

U. S. Shoe Industry Treads

To Mayflower's Third Trip

More than 800 generations have come to witness the light of day and retire since the first bearded craftsman wove at his loom the water-soaked, plant strands of a ripened, three-corned seed of papyrus to form the sandals which were to be worn by himself and members of his family.

In the field of modern shoe design, thousands of models have been brought forth. In the field of shoe tools and machinery, more than 8,000 patents portraying the genius of 1,000 inventors have been recorded. In the field of shoe manufacturing processes, scores of technological improvements have been devised. In the field of leather, hundreds of worthwhile innovations have been conceived. And in the many other industries closely allied to shoes and leather, hundreds of inventors have brought forth comparable improvements of benefit to the millions of people who of necessity use footwear.

The shoe industry in the United States started in 1829 when the Mayflower, on its third voyage to America, landed in the harbor of Salem, Mass. Shortly after anchor had been dropped, Thomas Bearse, a shoe maker of St. Martin's, London, and Isaac Rickman, a journeyman shoemaker, came ashore with bundles of hides and the rough implements utilized in the making of early foot-wear.

Shoes, in those days, were crude and ill-shaped and generally low around the ankle. For ornamentation, they carried huge silver buckles. The right shoe could not be distinguished from the left, and consequently shoes were worn on either foot.

Innerspring Mattress Has

Wide Margin in Popularity

There are two types of mattresses, the innerspring and the solid upholstered. Ever since the innerspring was introduced in the 1870s, it has been gaining steadily in popularity until today it represents 90 per cent of the consumer demand for mattresses. The well-known fact that the innerspring unit is designed to build up resistance in proportion to the weight of the sleeper is one of the reasons why the innerspring is held together divides all innerspring mattresses into two groups. The coils are individually encased in cloth pockets which are sewed to the mattress. In innerspring mattresses, it consists of filled cotton layers, curled hair or a combination of both. Various types of insulation, including silk, quilted or stitched pads and other special patented devices are used between the coil unit and the padding to keep it from working down into the coils.

Back in 1841—some 60 years before Pocahontas saved John Smith's life—the first white man set foot on Kansas soil. He was Gen. Francisco Vasquez de Coronado, who traversed "mighty plains" covered with "humpedbacked oaks." "The earth," he said, "is very strong and black, very well watered by brooks, springs and rivers, and the country itself is the best I have ever seen."

More than 300 years later, in 1854, settlement of Kansas was begun, and here commenced the battle over slavery which culminated in the Civil War. Kansas became a state, 400 miles wide and 200 miles deep, and after the Civil War, people poured into the state, plowed up grass and planted corn and wheat. These brave pioneers repulsed the Indians, and the herds of buffalo that once roamed the plains gave way to herds of cattle.

FIGHT CAR WEAR, RUST, SQUEAKS, RATTLES WITH UNDERSEAL

RUBBERIZED PROTECTIVE COATING

It's down underneath where any car shows its first signs of wear. That's where flying rocks, gravel and corrosive road salts eat away at under-surfaces, run down through start annoying squeaks and rattles. No wonder cars get old, ugly and noisy before their time!

Don't let that happen to your car! Protect it with "UNDERSEAL" Protective Coating, the new gateway on coating that covers under-surfaces with a tough, 1/4 inch thick "hide" which protects against rust, muffles squeaks and rattles, insulates against drafts, cold, heat, fumes, dust. Ask us about "UNDERSEAL" Protective Coating today. It's guaranteed to protect for the life of your car.

FARMERS AND DEPOSITORS BANK

ST. MATTHEWS, KY.
Member Federal Deposit Insurance Corporation

DEAR FOLKS:

This letter is written to you for two special purposes:

First, to tell you that we have 500 new safety lock boxes in which to store your important papers. The cost is only \$3.00 plus 60c tax, making a total of \$3.60. You can't afford to leave valuable papers around the house to be lost or burned. We have even heard of some people leaving Government Bonds and other valuable instruments around the house, taking a chance on losing them. Why in the world would anybody take such a chance after working so hard to get the money?

Second, if you do not already have your checking and savings account with the Farmers & Depositors Bank, you should have, for it is the best place to keep your money and it is insured up to \$5,000.00. Now is a good time to save your money. A balance in the bank makes a fellow feel mighty good.

When you come in, any officer, teller, or clerk will be glad to wait on you.

Very truly yours,
WALTER CRADY, President.

Farm Water System May Last For Years

Farmers who think a home water system too expensive to install should consider the convenience it will provide over the years. It is noted in a circular titled "Electric Water System for Farms," published by the College of Agriculture and Home Economics, University of Kentucky.

A pump and electric motor should last 15 to 20 years, and good plumbing 40 to 50 years. If a complete system costs too much it can be installed part at a time. A pump can be put in and water piped to the kitchen; later, a bathroom added. Finally, water can be provided in barns and other buildings.

New Corn Culture Uses Spray to Replace Hoe

(Too late for last week's Youth-Middle life and age. And life is past—So live each day that God will say "Well done" at last.)

Mr. Kenneth Bailey, who has been in Virginia for some months, is back home with his mother here.

Mr. and Mrs. W. H. Miller spent Sunday with their daughter, Mrs. Ed. Stenterman, and family on Vine Drive.

Mr. and Mrs. Dudley Shelburne visited his mother at a Louisville hospital Sunday.

Made a business trip to Shepherdsville Monday; surprised by the improvements along the way; very attractive.

Thanks to Mr. and Mrs. J. W. Brooks, we attended the special all-day service at Meadow Home Baptist Church Sunday and enjoyed a good lunch with fried chicken and a song service of unusual merit. They have talent there. Sorry not to see the Okona friends we anticipated meeting, but then the Price Howlets were there and the Hardys, and yes, Mrs. Kaufman, and last but not least by any means was Mr. George Jewell of the Western Recorder. All these we enjoyed fellowship with, as also the genial pastor there.

Rev. J. L. Lawrence with his wife and son will leave Wednesday for his vacation trip to his folks in North Carolina. Mrs. Lawrence will then go to her parents and stay with them four weeks while Bro. Lawrence will return to his work here. In his absence the pulpit at Little Flock will be filled by Rev. Rex Campbell, of the Seminary graduating class.

Mr. and Mrs. Milton Church, and Mrs. Milton Church, Jr., and baby, Charlene Rose, were our guests last Wednesday.

This culture, in short, abandons many practices which most advanced scientists have been attacking for several years, and it is finally proved successful. It will not only produce bumper corn crops, but will probably change methods of growing many other crops.

There is no better place to try this new culture than on a small patch of

Summer Print

Western Kentucky county agents believe wider use of hay-drying equipment will encourage the growing of better clover crop of much merit both for pasture and hay.

In Graves county, Biggs Roberts has installed home-made barn hay-drying equipment. Other than motor and wiring, all parts were made on the farm. A mixture of rye and vetch was the first crop cured. Then will follow alfalfa and clovers.

L. H. Mays, of Trigg County, has put in a commercial barn drying outfit. He uses a field chopper and blower at the barn for harvesting and storing hay from 50 acres of alfalfa.

THE GARDEN

By John S. Gardner, Kentucky College of Agriculture and Home Economics

MORE ABOUT D. D. T.

Although the insecticide DDT is not of general value to home gardeners, there are several instances in which it may be used to do a job that none of the other materials do as well, if at all.

The insect, the black flea-beetle, and the vegetables are tomatoes, eggplants and sweet-potatoes. Flea-beetle damage is puncturing the foliage with many minute holes so close together that the tissue dies and the leaves drop off. Without its leaves a plant cannot function in manufacturing starches or sugars, as a case may be, if it can survive at all.

Newly set tomato plants are especially destructive. If they are or if not, they are so much weakened as not to regain their vigor for weeks, bearing late and lightly, too.

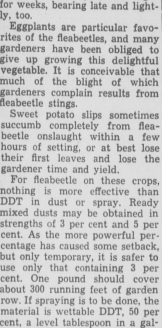

Eggplants are particular favorites of flea beetles, or, if not, they are so much weakened as not to regain their vigor for weeks, bearing late and lightly, too.

Sweet potato slips sometimes succumb completely from flea-beetle onslaught within a few hours of setting, or, if not, they lose their first leaves and lose the garden time yield.

For flea beetles on these crops, nothing is more effective than DDT in dust or spray. Ready to use, it can be obtained in strengths of 3 per cent and 5 per cent. As the more powerful percent is a level tablespoon in a gallon of water, it is safer to use only that containing 3 per cent. One pound should cover about 300 running feet of garden row. If spraying is to be done, the material is wettable DDT, 50 per cent, a level tablespoon in a gallon of water.

Generally one application suffices for the season; a second, two weeks later, to cover the new foliage, is not wasted.

Accessory Set To Crochet

WEARING last year's suit? Add a new hat and bag to the ensemble for wardrobe sparkle. Here's a set you can crochet of cotton in the accessory color of your choice. The crownlike cap is small, the drawstring bag is large and comfortable to carry. The best trimming is optional. A direction leaflet for crocheting this BEAD-TRIMMED HAT AND BAG SET may be obtained by sending a stamped, self-addressed envelope to the Needlework Department, Reader Service, requesting Leaflet No. PC 1748.

Season To Watch For Chicken Disease

This is the season when coccidiosis in the poultry flock, according to the College of Agriculture and Home Economics at Lexington, is most likely to appear among chicks two to four weeks old, although older birds are not immune.

Affected chicks become droopy, let their wings sag, and lag behind the rest of the flock. Beak and shanks are pale. Many chicks usually develop the disease about the same time.

Infected chicks eat little, and so become thin, and often die in a few days, although they sometimes recover. In chronic coccidiosis, chicks grow slowly and usually are poorly feathered, pale and thin. In older birds the combs are blue, and the birds are inactive.

Farms To Fore As U. S. Uses Oil At Rate 28 Times Rest Of World

The U.S. today consumes 28 times as much oil per person as does the rest of the world, using oil for industry, transportation, the home and the farm. With the close of the heating season, current emphasis is on the farm use as spring plowing begins. Since 1945, the farmer has virtually doubled his use of gasoline for tractors and other equipment and is utilizing Diesel oil, kerosene and bottled gas in increasing quantities.

World's Hungry Children Get Food Relief Under Stars and Stripes and U.N. Banners

Children's Crusade Builds Friends for America Amid Chaotic Conditions Abroad

NEW YORK, May 8.—You could call it star-spangled milk powder.

served under the Stars and Stripes.

It comes from the U.S.A. And wherever it goes, to hungry children all over the world, it brings a star-spangled brightness to their eyes.

In many of the children in Poland, Czechoslovakia, Italy, France, Finland, China, never saw milk of any kind before their generous friends in America, through the voluntary foreign relief agencies, sent them the stuff that builds bones and builds a friendship.

Today, millions of kids have a chance to recover from rickets, from tuberculosis, from the gnawing rages of hunger with which they have lived all their lives, because Americans are sending them red-white-and-blue calories and kindness.

In the name of the Crusade for Children of American Overseas Aid-United Nations Appeal for Children, Americans are subscribing \$400,000 this year to help finance the foreign relief activities of 25 voluntary American agencies.

Under the leadership of Julius Perlatin, recently returned from a two-year United Nations mission in Poland, reports a need for more food and medicine on the part of millions of children in Europe. He urged American contributions to the campaign to feed the hungry children of the world.

Recipients informed. The children, he emphasized, know where the food comes from, and the governments help to keep them informed.

He reported that it is a definite policy of the Polish government to reward the children who receive the United Nations International Children's Emergency Fund milk at feeding points explain the nature of UNICEF to which the United States is a large contributor. In addition to press and radio cooperation, teachers, doctors and parents tell the children that food is coming to them through the United Nations, for which the

STAR-SPANGLED MILK—Under the American flag, milk served to hungry children abroad brings star-spangled brightness to eyes that have known starvation. Photo above was taken in Czechoslovakia in March, showing that despite governmental changes, American-given relief, building healthy bodies and firm friendships, is recognized as coming from the land of the free.

United States provides the greatest financial strength. Mr. Perlatin also gave assurance that all food provided through UNICEF is accounted for from the moment it arrives.

Our Mission knew where every ounce of food went from the moment it entered Poland until a child ate it," Mr. Perlatin declared.

The bulk of UNICEF food shipments are of dry skin milk which is valuable to hungry children abroad because of its protective food elements. It is estimated that 250,000 children in Europe and Asia do not get enough food for normal health or growth. UNICEF is feeding 4,000,000 children in Europe, and is starting a feeding program in Asia. The people of some 50 nations are cooperating

ing Commission is to hear the request to establish a playground on the site on May 18.

Proposals for New Canal Across Nicaragua Revived

Evacuation of United States military bases in Panama again has brought to the fore proposals for a canal across Nicaragua.

Nicaragua has exclusive proprietary rights for construction and maintenance of an interoceanic canal across Nicaragua. The treaty also grants a lease on the Corn Islands in the Caribbean and the right to establish a naval base on the Gulf of Fonseca in the Pacific.

A half dozen surveys of possible canal routes across Nicaragua have been made in bygone years. One proposed course is 173 miles long, 122 miles longer than the Panama Canal. It would shorten the distance between New York and San Francisco by 400 miles.

This course would take the canal across Lake Nicaragua for 70 miles. Actual construction of the canal on either side of the lake this would be only twice the length of the 51-mile Panama canal.

The plan calls for creation of a harbor at Brice on the Pacific coast. Ascending Grande river valley for nearly three miles from the Pacific, three twin or two-lane locks would lift ships 110 feet. A cut through the height divide, with its maximum height of 153 feet, would carry the canal to the basin of Las Lajas river. The river would be followed nearly 12 miles to Lake Nicaragua.

Quality Pillow Required To Assure Proper Rest

A good pillow is essential for proper support of the head so that the neck muscles may rest comfortably. If a pillow is not used and the head is not supported comfortably, the spine is thrown out of alignment. The quality of a pillow can be determined by its filling and by its characteristics: It must be light in weight, resilient, buoyant and free from odor, dust and stiff feathers. There are three types of fillings used in good quality pillows: All-down, a combination of down and waterfowl feathers, and all-waterfowl feathers. An all-down pillow is the most expensive, but is really too soft for comfort as it lacks the buoyancy supplied by waterfowl feathers. The mixture of down and waterfowl feathers is an ideal combination, and the least expensive of the three.

Crushed, chopped or artificially curved waterfowl feathers are generally less desirable because these processes destroy the natural resilience of the feathers. Goose and duck feathers are springy and resilient. They are full and fluffy, and their shafts are naturally curved and buoyant. Although goose feathers are considered better, because they are stronger and fluffier, a good quality duck feather often is better than a low grade goose feather.

Dogs Big Aid to Hunters

During the 1947 pheasant season one of 11 hunters took along his dog and one out of every five hunting parties had a hunting dog to find dead and crippled birds. These facts were revealed by analysis of interviews in the field with 4,941 hunters. That Rover paid for his dog biscuits and place behind the stove is shown by the fact that hunters using dogs lost only one bird for every nine shot down. Hunters not using dogs lost one out of every four birds shot down, or twice as many for each bird brought to bag as dog-aided hunters. Hunters using dogs on pheasants required two hours hunting for each bird in their hunting

cost. For hunters without dogs it took three hours to bring a bird to bag. The field check revealed the Labrador as the most popular dog in use, with springer spaniel running second in numbers used, cocker spaniel third, pointer and Chesapeake tied for fourth, and setters fifth.

Preferences in Milk

Consumers in 11 states expressed their preferences in milk to American Home Economics association. They indicated that safe milk is one of the foremost wants of consumers. The voters came out strong from milk from herds that have been examined, tested and declared free from disease; milk handled by persons examined and found healthy; milk produced only in inspected dairies, and milk that has been pasteurized. Labels on milk containers were second in interest. In order of importance, consumers want the label to state grade, type of milk, date produced, butler content, name of distributor and vitamin content. Glass containers got more votes than paper containers, square shape was the preference of those who considered shape.

Dogs With Encephalitis

Dog owners are being warned by American Veterinary Medical association that encephalitis, a virus disease affecting the brain and nervous system, may be responsible for a great many of the dog losses heretofore attributed to distemper. The disease has stricken more than 600 dogs in St. Cloud, Minn., area in the past year. An attack of encephalitis usually begins with violent convulsions, followed by a lethargy in which the dog appears to be walking in its sleep. Anti-encephalitis serum is an effective treatment in early stages of the disease. Prevention by vaccination still is in the experimental stage.

Objectors To Brown's Lane Play Center

Lights, privies and possible devaluation of their property were objections listed Monday night against a recreation center on Brown's Lane by residents of that neighborhood.

The objectors met at Greathouse School with members of the St. Matthews Recreation and Community Center.

Committees and representatives of the Jefferson County Recreation Board in an unsuccessful attempt to come to an agreement.

Meanwhile, more than 400 persons have signed a petition against use of a 37-acre field as a temporary recreation center. The property was delegated for such use by the Louisville Board of Education which plans to erect a school on the site should St. Matthews be annexed to Louisville.

Sam Manly, III, 722 Brown Lane, spokesman for the neighborhood group, said there is no objection to use of the field as a playground for children. However, he said, residents are solidly against erection of lights for night activities.

Charles Vettiner, County Recreation leader, replied that the night programs are designed specifically to meet a need of night pastime for teen-agers. "If St. Matthews doesn't want the support of the County in the project we can use the funds some place else," he said. The County furnishes full time supervisors for the playground.

Another supporter of the recreation program said, "the lights have been moved back 600 feet from Browns Lane and if residents can't put up with them for three hours a night three months out of the year in order to solve juvenile delinquency problems, then they just aren't very big people."

According to Tom Ball, president of the Community Center, "there's apparently been a lot of
